Summary

Front-End Developer experienced in React, WordPress, and WooCommerce, with a delivered booking platform and an e-commerce store. Currently in IT support and seeking a Front-End role to apply my React and JavaScript skills in building fast, user-friendly interfaces.

Skills

Front-End Development
HTML5, CSS3, JavaScript, React.js, React Router, Redux, Bootstrap.

Back-End & Computer Science
Python, Object-Oriented Programming (OOP), Data Structures, Algorithms.

CMS & E-Commerce

- WordPress, WooCommerce, Kadence Framework, Payment Gateways (Stripe, PayPal, MyFatoorah, Paymob, Fawry).

Design & UI/UX
Figma, Adobe Photoshop, Adobe Illustrator.

Tools, Deployment & Best Practices
Git/GitHub, Netlify, Postman (API Testing), Debugging & Performance Optimization, Clean Code.

Experience

IT Support & Network Technician, *Armed Forces Information Systems Department* 08/2026 – Present
Egypt

- Maintained and troubleshot network equipment (routers, switches, ONTs) to keep internet stable across the property.
- Installed and maintained CCTV systems (NVRs) and the centralized satellite TV system.
- Provided technical support for desktops, printers, and Avaya phone systems, resolving incidents quickly to minimize downtime.

WordPress Developer, *Golden Trilar Factory* 08/2025 – 01/2026
(Company specializing in manufacturing trailers) Remote - Saudi Arabia

- Developed a full trailer booking website using WordPress and the Gutenberg editor, implementing optimized workflows, responsive UI components, and performance improvements.

WordPress Developer, *Barah brand* 09/2025 – 10/2025
(Company focused on clothing sales) Remote - Kuwait

- Developed an e-commerce store for a Kuwait hoodie brand using WordPress, WooCommerce, and the Gutenberg editor.
- Integrated MyFatoorah payment gateway to support KNET and credit card payments for Kuwait customers.

Projects

MailFlow – Email Campaign Manager
Python, FastAPI, Jinja2, SMTP
- Built a campaign management system supporting CSV recipient import, email validation, and duplicate detection.
- Implemented personalized HTML email templates with Jinja2 and SMTP-based delivery.
- Added background processing, automatic retries, SMTP connection testing, and real-time progress tracking.

Prayer Times App
React, Vite, Aladhan API
- Developed a responsive web app that displays accurate prayer times by city using real-time data from the Aladhan API.
- Designed a clean Glassmorphism interface and optimized build performance with Vite.

Tasks App
HTML5, CSS3, JavaScript, LocalStorage
- Built a responsive to-do app for adding, editing, and completing tasks.
- Used LocalStorage to persist user data in the browser.

CRUD Product Management System
Vanilla JavaScript
- Developed a product inventory app implementing full CRUD operations (create, read, update, delete).

Education

Information Technology & Computer Science, *Sinai University* 08/2020 – 06/2024
- Major: Information Technology Al Isma'iliyah, Egypt
- Grade: Very Good
- Graduate Project: Excellent

Training & Certifications

CS50x: Introduction to Computer Science – Harvard University 2024

Introduction to Front-End Development – Meta, Coursera 2026

JavaScript for Dynamic Web Development – Packt, Coursera 2026

Artificial Intelligence (50-hour blended program), Zewail City 2024
